Portable Air Conditioner

IMPORTANT – Basic Safety, Operating and Installation Precautions:

- Unit must stay upright for 24 hours before use
- Unit must be vented to the outside
  - Use included window installation kit and follow detailed installation instructions in the Owner's Manual
- Unit must be plugged into a grounded 60 Hz, 120 VAC outlet protected by a 15 amp time delay fuse or circuit breaker
- Do not plug other appliances into the same outlet; it can overload the circuit
- **Do not use extension cord(s)**
- Make sure the air conditioner is positioned where it will receive proper ventilation
  - Do not place it directly next to furniture or objects that could block the vent openings
- Do not add extra hose length to the included exhaust hose; it can affect unit performance

Thank you for purchasing an LG portable air conditioner!
